

My Setup

Home PC

I use it occasionally when i have some free time to play games. I experiment with some retro stuff on x86box or play some retro games on this PC. Another task that this AMD cpu is good at is emulation of some consoles that have shaders ported to Vulkan, so yeah i like playing Wii U games on this PC.

- Brand name: T-Bao MN58U
- CPU: AMD Ryzen 7 5800U
- GPU: Radeon Vega integrated graphics
- RAM: 32GB DDR4-3200
- Storage: 1TB ssd (system), 2TB hdd (data)
- Software
 - OS: Linux Mint
 - DE: Cinnamon
- Accessories:
 - Mouse: Logitech Marathon M705
 - Keyboard: Logitech MX keys S black

Main Laptop

I have used dell vostro up to 10 april 2026, but now i wanted to buy something local instead of slop that is given tu us by the big companies like hp, dell, lenovo etc. So i decided to buy a laptop from local manufacturer (ntt.pl, the model i decided on is listed below)

When it comes to the usecase i use it for everything, some slight coding, maintaining my websites and services, for my daytime job (sysadmin/network design), for my side gigs (programming/tutoring) for university (cs) and other thingies in the mean time (playing minecraft with friends on business trips :3)

My new made in EU notebook

- Brand name: NTTbook B15
- CPU: Intel Core i5-1334U
- GPU: Intel UHD Graphics
- RAM: 16GB
- Storage: 512GB (data+system luks encrypted)
- Software
 - OS: Linux Mint
 - DE: Cinnamon

My old laptop

- Brand name: Dell Vostro 15 5590
- CPU: Intel Core i5-10210U
- GPU: Intel UHD Graphics 620
- RAM: 16GB
- Storage: 256GB ssd (system), 256GB ssd (data luks encrypted)
- Software
 - OS: Linux Mint
 - DE: Cinnamon

Other curiosities in my collection

- 3gen intel PC that runs as rdp server in my living room
 - Regrettably it is running windows, because i need it sometimes to test things in windows

environment for my sysadmin job

- Thinkpad X61
- Macbook pro 2011
- Thinkpad L440
- Thinkpad 11e
- Chuwi Minibook X
- Giada mini industrial pc 3gen intel
- 3 Big rack servers. I do not know what to do with them X3
- Some network equipment like old cisco and zyxel switches, mikrotik routers etc.
- oscilloscope, signal generators and some other lab equipment
- Commodore 64
- Elektronika Mk-59 calculator
- Nintendo DS lite
- Nintendo 2DS
- Linux Emulation handheld R36S
- and multiple different computer and electronic parts laying all around :3
