Publications

Self-prepared materials—from drafts to organized notes—created with practical learning in mind. These are not peer-reviewed publications, but original works made available as open educational resources.

No subnamespaces.

Blog posts

This is where I post various texts that didn't fit into the format of a "serious" publication – everything from Arduino to people who (perhaps accidentally) defined computer science. A little bit of knowledge, a little bit of testing, sometimes experiments with AI, and sometimes just testing various available solutions. I publish whatever catches my eye and interests me – without any pressure, just sharing what I'm currently into 😉.

- API testing tool
- Memories from the minecraft server
- My subjective opinion on console generations and modern games
- NASA photo archive
